Education

Northeastern University, Boston, MA

Jan. 2017 - Present

CANDIDATE FOR MASTER OF SCIENCE IN DATA SCIENCE, GPA: 3.5/4.0

Expected Graduation: Apr 2019

- **Relevant Courses** : Natural Language Processing, Supervised Machine Learning, Applied Probability and Stochastic Processes, Unsupervised Machine Learning, Computer Vision, Special Topics in Artificial Intelligence - Text Mining for Humanities and Social Sciences, Information Visualization

Government Engineering College, Thrissur

Sep. 2007 - June 2011

BACHELOR OF TECHNOLOGY

- **Relevant Courses** : Data Structures and Algorithms, Database Management Systems, Programming Paradigms, Numerical Analysis and Optimization Techniques, Design and Analysis of Algorithms

Technical Knowledge

Specialities	Natural Language Processing, Classification and Clustering, Regression, Deep Learning, & Distributed Computing
Programming Languages	Python, C++, Shell Scripting, Java, Groovy, Javascript
ML Tools/Frameworks	Tensorflow, Scikit-Learn, Pandas, Matplotlib
Big Data Ecosystem	Apache Spark and Spark Mllib, Apache Hadoop, Hive, Sqoop, Oozie
Databases	MySQL, MongoDB, HP Vertica
Certifications	Scalable Machine Learning(edX), Introduction to Big Data with Apache Spark (edX), Machine Learning (Coursera)

Recent Academic Projects

- **Investigating Instances of Gun Violence using Pointer Networks**: Proposed a novel model that employs Attention Mechanism in Sequence-to-Sequence learning and Pointer Neural Nets to extract the attributes of gun violence events from news reports.
- **Quantifying Semantic Similarity**: Designed and implemented a sequence-to-sequence model (Long Short-Term Memory Network) for classifying semantically similar and dissimilar questions from Quora, carrying an accuracy of 83% on validation after tuning.
- **The Fake News Stance Classification**: Achieved an accuracy of 88% on classifying fake news from the genuine ones to four discrete levels - agree, discuss, disagree, and unrelated using handcrafted linguistic features along with distance features from vectorized fields(Word2Vec). Random Forests, Support Vector Machines, and XGBoost algorithms were used for performance comparison.
- **Home Value Prediction**: Modeled Zillow's house rent prediction problem using Microsoft's LightGBM algorithm with a mean absolute error of 0.064.

Experience

Centre for Complex Networks Research, Northeastern University

Boston, USA

GRADUATE STUDENT RESEARCHER

Jan 2019 - Present

- Studying the effects of the linguistic structure of titles and abstracts of scientific publications in creating impact among researchers and building non-linear quantitative models to estimate it.

Enterprise Risk - Analytics, Fidelity Investments.

Boston, USA

DATA SCIENTIST (CO-OP)

Jan 2017 - July 2017

- Modeled the detection of anomalies in SOCKS proxy logs for suspicious network activity using Isolation Forest and Local Outlier Factor.
- Developed a framework for enhanced exploratory data analysis of SOCKS connection logs on PySpark.

Data Science Group, Innovation Labs, [24]7.ai Inc.

Bangalore, India

SENIOR DATA ENGINEER

June 2016 - Dec 2016

- Modeled chat transcripts from customer conversations for user intent prediction for customer agent queue routing that achieved a recall of 87%.
- Designed and developed a Natural Language toolkit on PySpark for chat transcript data analysis and modeling.
- Configured the toolkit on a multi-cluster environment with three apache spark nodes for scalability.

Data Science Group, Innovation Labs, [24]7.ai Inc.

Bangalore, India

DATA ENGINEER

May 2015 - June 2016

- Analyzed and modeled user data from web for several clients in the e-commerce domain for increasing chat propensity of potential customers with customer agents and uplifting purchases.
- Integrated SVM algorithm into the domain specific custom modeling tool and scaled over a million data points.

Xurmo Technologies Pvt. Ltd.

Bangalore, India

SOFTWARE ENGINEER

July 2011 - May 2015

- Developed custom analytical functions for Xurmo Big Data Platform for data transformation.
- Programmed analytics applications using Platform as a Service modules - Text exploration engine, Stock market movement prediction, Sentiment analyzer, Customer churn prediction.
